## Add PSP To DEP Exclusion List

**Both 32 & 64 Bit Computer Users :**

This fix is what I use all the time with my Dell I swear this helps allot for me this is for Windows 7-10 both 32 and 64 bit users this helps getting your plugins running better on a new computer and newer version of Paint Shop Pro we need to add PSP in the list to stop some plugins being rejected: and I have no problems with my plugins the guy who taught me PSP pointed this out to me most psp people do not know this or do not do it they recommend this on the Corel PSP Forums too ... I recommend if you have newer Paint shop Pro Specially PSPX6 to current and Windows 7-10 to do this if it does not help you can undo it .. very easily ..

this fix helps make PSP 32 & old plugins show & run better in Windows 7-10

**Data Execution Prevention (DEP)** is a security layer that has been a part of Window Appearance since XP Service Pack 2. DEP is a processor feature . Unfortunately, legitimate older software & older plugins that has not yet been updated to comply with DEP will be prevented from running as well.

**You will need to add** only your psp 32 bit to the except list not your 64 bit so your old plugins can run you be sure to reboot computer afterwards this is a really easy to do I promiseHow To Add to DEP List

### How To Add to DEP List

**Windows Vista- 7 Users**

Go Start / Control Panel

Click on System & Security

Click on Security

On Left Side Click on Advanced System Setting

Click on Advanced

Go To Performance under Performance Click Settings

Go To Data Execution Prevention tab ( **look at picture below** )

Be sure Turn on DEP for all programs and services except those I select: is marked

Click on the Add tab find your PSP 32 bit icon press Apply & Ok ( **look at picture below** )

32 bit PSP Icon that you need to add Location IS Under C:\Program Files (x86:)

**C:\Program Files (x86)\Corel\Corel PaintShop Pro 2018\Corel PaintShop Pro.exe**

**(it will look like like your 32 bit PSP icon that appears on desktop or taskbar )**

and Reboot Computer

### **Windows 8 Users**
